

EduTECH 2022 is set to take place in Melbourne at the Melbourne Convention and Exhibition Centre on 10 & 11 August. With two years of pent-up demand and an eagerness to upskill and reconnect in-person, the education sector is extremely excited to be returning to a face-to-face event format.

In partnership with Global Victoria and the Victorian Department of Education, EduTECH brings together the entire education lifecycle and hosts 10,000+ education and training professionals under one roof over two days to learn, debate, exchange ideas, be inspired and network.

Expo Highlights

The free to attend EduTECH Expo encompasses 12,000 square metres of space that hosts 250+ market leaders.

Not only can attendees participate in exclusive expo floor educational seminars but they're also able to walk the expo floor to explore and evaluate the latest products, services and technologies from exhibitors such as Clevertouch, Corsair Solutions, Superloop CyberHound, Juniper Networks, Lego Education, Lenovo, Adobe, Aruba, Canvas, Class Technologies, IG3 Education, Lark Industries, Modern Teaching Aids, RMIT Training, ASI Solutions, Schoolbox, VEX Robotics, Azendian Solutions, Jamf, Tes and many more!

Why attend the Expo?

- Attend free product demonstrations.
- Evaluate and test emerging tech side-by-side.
- Connect with hundreds of suppliers who are on hand to answer questions and help you.
- Get expert advice on specific challenges you're facing whether from a supplier, consultant, colleague or competitor, everyone is in attendance.

Conference Highlights:

The paid conference offers quality professional development and features 12 multi-streamed conferences, seven training forums and 15 practical breakout seminars. Learn from some of the industry's brightest minds sharing insights on school leadership, school teaching, digital technologies, school ICT management and learning spaces. As well as thought-provoking and interactive sessions led by Apple, Microsoft, Google for Education and EduGrowth.

The agenda covers critical changes such as the new curriculum, partnering with business, cyber security essentials for students and teachers alike, micro-credentials, ed-tech to assist learning, as well as invigilation and assessment. Plus, tech to assist teachers with workload and reporting, how creativity and tech can co-exist, how to keep students engaged, STEM, citizen science, learning spaces, integration of indigenous history, new funding models, wellbeing and so much more!
